GENERAL KNOWLEDGE (GS) — IN-DEPTH OFFICIAL EXPLANATIONS & RATIONALES

Q.1 [] — Correct Answer: (B)

Question: According to the Election Commission of India, in order to be recognized as a ‘National Party’, a political party must be treated as a recognized political party in how many States?
Explanation: Official UPSC CDS Solution: Assessed under Indian Polity & Constitution according to UPSC CDS standards.

Q.2 [] — Correct Answer: (C)

Question: By which one of the following, an old written material which cannot be read easily, can be read?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Indian Polity & Constitution).

Q.3 [] — Correct Answer: (A)

Question: Consider the following statements regarding the writ of 'Quo-Warranto':
Explanation: Statement 1 is correct: Quo-Warranto is issued by the High Court or Supreme Court to inquire into the legality of a claim by a person to a public office. Statement 2 is incorrect: Unlike habeas corpus or certiorari, any public-spirited citizen can move the court for Quo-Warranto; the petitioner need not be an aggrieved person.

Q.4 [] — Correct Answer: (B)

Question: According to the Constitution (Fifty-Second Amendment) Act 1985 as amended in 2003, a legislator attracts disqualification under the Tenth Schedule if: 1. He voluntarily gives up the membership of the party on whose ticket he was elected. 2. He votes or abstains from voting contrary to any direction issued by his political party. 3. As a result of split, less than one-third of the members formed a new group or party in the house. 4. A member who has been elected as an independent member joins any political party. Select the correct answer using the code given below :
Explanation: Under the Tenth Schedule (Anti-Defection Law), a member is disqualified if they voluntarily give up party membership, vote contrary to party whip without prior permission, or if an independent member joins any political party. The 91st Amendment (2003) deleted the exemption for 1/3rd split, requiring at least 2/3rd for merger.

Q.5 [] — Correct Answer: (A)

Question: For which one of the following landmark judgments of the Supreme Court of India is the Kesavananda Bharati case (1973) famous?
Explanation: In Kesavananda Bharati v. State of Kerala (1973), a 13-judge bench of the Supreme Court ruled by a 7:6 majority that Parliament has broad powers to amend the Constitution under Article 368, but cannot alter its 'Basic Structure'.

Q.6 [] — Correct Answer: (A)

Question: In Indian constitutional history, what was the 'Privy Purse' that was abolished by the 26th Constitutional Amendment Act, 1971?
Explanation: Privy Purse was a payment made to the royal families of erstwhile princely states as part of their agreements to integrate into the Union of India in 1947. It was abolished in 1971 by the 26th Amendment Act under Indira Gandhi.

Q.7 [] — Correct Answer: (A)

Question: In democratic political theory and constitutional design, why is power sharing considered desirable in diverse societies?
Explanation: Power sharing accommodates social diversity, prevents majoritarian domination, and fosters political stability by giving all communities a stake in governance.

Q.8 [] — Correct Answer: (A)

Question: In sociology and developmental psychology, which of the following is considered the primary and earliest agency of socialization for an infant?
Explanation: The family is the primary agency of socialization where a child first acquires language, behavioral norms, emotional attachments, and cultural values.

Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Indian History & Freedom Struggle).

Q.48 [] — Correct Answer: (C)

Question: Which Buddhist Council was convened during the reign of King Ashoka at Pataliputra?
Explanation: The Third Buddhist Council was convened in 250 BCE at Pataliputra under the patronage of Emperor Ashoka and presided over by Moggaliputta Tissa. The Abhidhamma Pitaka was compiled here.

Q.49 [] — Correct Answer: (C)

Question: Which One among the following is not a characteristic Of Rig-Vedic Aryans ?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Indian History & Freedom Struggle).

Q.50 [] — Correct Answer: (A)

Question: Which among the following was the most immediate catalyst for the nationwide spread of the Swadeshi and Boycott Movement in 1905?
Explanation: Lord Curzon announced the Partition of Bengal in July 1905 and implemented it on 16 October 1905, triggering the anti-partition Swadeshi and Boycott movement.

Q.51 [] — Correct Answer: (A)

Question: Which of the following Harappan sites has provided evidence of a ploughed field?
Explanation: Evidence of a ploughed field with criss-cross furrows was discovered at Kalibangan (Rajasthan). Lothal is famous for its tidal dockyard; Dholavira for water harvesting.

Q.52 [] — Correct Answer: (C)

Question: Which of the following statements regarding Gandhian mass movements is not correct?
Explanation: Statement (c) is incorrect. Centralized, disciplined leadership and strict moral command were vital hallmarks of all Gandhian campaigns (Non-Cooperation, Civil Disobedience, Quit India).

Q.53 [] — Correct Answer: (A)

Question: Which of the following statements regarding the spiritual teachings of Guru Nanak Dev, the first Sikh Guru, is correct?
Explanation: Guru Nanak emphasized universal love, honest labor (Kirat Karo), sharing with others (Vand Chhako), and meditation on the Divine Name (Naam Japna) while rejecting caste prejudices.

Q.54 [] — Correct Answer: (A)

Question: Which of the following was the decisive battle in 1760 in which the British forces commanded by Sir Eyre Coote decisively defeated the French under Count de Lally during the Third Carnatic War?
Explanation: The Battle of Wandiwash (22 January 1760) ended French military influence in India and cemented British commercial and political hegemony.

Q.55 [] — Correct Answer: (A)

Question: Which one among the following was the historic session of the Indian National Congress where the resolution for 'Purna Swaraj' (Complete Independence) was adopted?
Explanation: At the historic Lahore Session in December 1929, under the presidency of Jawaharlal Nehru, the Indian National Congress adopted the Purna Swaraj resolution declaring complete independence as its ultimate goal.

Q.56 [] — Correct Answer: (C)

Question: Which one among the following was not a possible reaSon for •the success of Nadir Shah's military campaign in Delhi ?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Defence, Military & Current Affairs).

Q.57 [] — Correct Answer: (B)

Question: Which one of the following Commissions was appointed by the British Government to investigate the Jallianwala Bagh massacre (1919)?
Explanation: The Hunter Committee (Disorders Inquiry Committee), headed by Lord William Hunter, was appointed in October 1919 to investigate the Jallianwala Bagh massacre in Amritsar.

Q.58 [] — Correct Answer: (A)

Question: Which one of the following inscriptions mentions Pulakesin II's military success against Harsh avardhana?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Geography (Physical, Indian & World)).

Q.59 [] — Correct Answer: (C)

Question: Which one of the following statements with respect to Indian Air Force is not correct ?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (General Science (Physics, Chemistry, Biology)).

Q.60 [] — Correct Answer: (A)

Question: Which one of the following statements regarding the Brihadeeswara Temple at Thanjavur is correct?
Explanation: Brihadeeswara Temple (Peruvudaiyar Kovil) is a grand Dravidian granite temple dedicated to Lord Shiva, completed in 1010 CE by Rajaraja Chola I.

Q.61 [] — Correct Answer: (A)

Question: Which one of the following traditional dance forms is a ritualistic folk dance involving masks made of arecanut spathe, performed in the temples of Central and Southern Kerala?
Explanation: Padayani (or Padeni) is an ancient ritualistic folk theater and mask dance performed in Bhadrakali temples of Central Travancore, Kerala.

Q.62 [] — Correct Answer: (B)

Question: Who among the following was elected as the President of the All-India Khilafat Conference met at Delhi in November 1919?
Explanation: Mahatma Gandhi was elected President of the All-India Khilafat Conference in Delhi in November 1919. He saw the Khilafat movement as a prime opportunity to unite Hindus and Muslims in the national struggle.

Q.63 [] — Correct Answer: (B)

Question: Who among the following led the 1857 Revolt in Bihar?
Explanation: Veer Kunwar Singh of Jagdishpur (Arrah, Bihar) led the 1857 Revolt in Bihar with exceptional guerrilla warfare tactics at the age of nearly 80.

Q.64 [] — Correct Answer: (D)

Question: Who among the following was not a party to the tripartite confederacy that fought against the British East India Company in the Battle of Buxar (1764)?
Explanation: Siraj-ud-Daulah fought in the Battle of Plassey (1757) and was killed soon after. The Battle of Buxar (1764) was fought between Hector Munro and the combined forces of Mir Qasim, Shuja-ud-Daula, and Shah Alam II.

Q.65 [] — Correct Answer: (A)

Question: Who among the following Governors-General of India created the Public Works Department (PWD) and introduced electric telegraph and railways in India?
Explanation: Lord Dalhousie (1848–1856) created the separate Public Works Department (PWD), introduced the first passenger railway (1853, Bombay to Thane), electric telegraph lines, and modern postal system.

Q.66 [] — Correct Answer: (A)

Question: Who among the following eminent Urdu poets and scholars was invited to attend both the Second and Third Round Table Conferences in London?
Explanation: Sir Allama Muhammad Iqbal attended the Second (1931) and Third (1932) Round Table Conferences in London.

Q.67 [] — Correct Answer: (A)

Question: Arrange the following left-bank tributaries of the River Ganga from West to East in sequential order: 1. Gomti 2. Ghaghara 3. Gandak 4. Kosi Select the correct answer using the code given below:
Explanation: From west to east, the major northern Himalayan tributaries joining the Ganga are: Ramganga, Gomti, Ghaghara, Gandak, and Kosi.

Q.68 [] — Correct Answer: (C)

Question: BrahMos is a supersonic cruise missile developed as a joint venture between India and:
Explanation: BrahMos (named after the Brahmaputra and Moskva rivers) is a joint venture between India's Defence Research and Development Organisation (DRDO) and Russia's NPO Mashinostroyeniya.

Q.69 [] — Correct Answer: (C)

Question: Consider the following statements regarding the Inter-Tropical Convergence Zone (ITCZ): 1. In the month of July, the ITCZ shifts northward over the Indo-Gangetic Plain (monsoon trough). 2. The ITCZ is a broad trough of low pressure characterized by convective clouds and heavy rainfall. Which of the statements given above is/are correct?
Explanation: Both statements are correct: The ITCZ moves northwards towards the Tropic of Cancer in boreal summer, positioning over northern India where it is referred to as the monsoon trough.

Q.70 [] — Correct Answer: (C)

Question: Consider the following statements regarding Iodine in human physiology: 1. Iodine is an essential mineral required by the thyroid gland to synthesize thyroxine hormone. 2. Deficiency of iodine in diet leads to simple goiter. Which of the statements given above is/are correct?
Explanation: Both statements are correct: Iodine is incorporated into thyroxine (T4) and triiodothyronine (T3). Inadequate dietary iodine causes thyroid enlargement (goiter).

Q.71 [] — Correct Answer: (C)

Question: During the year 2009-2010, which one of the following sectors recorded the highest growth rate in the Indian economy?
Explanation: According to Economic Survey data for 2009-10, the manufacturing and industrial sectors recorded double-digit expansion following stimulus measures.

Q.72 [] — Correct Answer: (B)

Question: Extrusive volcanoes are not found in
Explanation: Official UPSC CDS Solution: Assessed under Geography (Physical, Indian & World) according to UPSC CDS standards.

Q.73 [] — Correct Answer: (A)

Question: In which of the following cities is the India Security Press (ISP), which manufactures passports, postage stamps, and judicial stamp papers, located?
Explanation: The India Security Press (ISP) is located at Nashik Road, Maharashtra, under SPMCIL. Bank notes are printed at Dewas and Nashik.

Q.74 [] — Correct Answer: (C)

Question: In which one of the following islands of India is an active volcano found?
Explanation: Barren Island in the Andaman and Nicobar Islands is the only confirmed active volcano in India and the South Asian subcontinent.

Q.75 [] — Correct Answer: (A)

Question: In which one of the following cities is the headquarters of the Forest Survey of India (FSI) located?
Explanation: The Forest Survey of India (FSI), an organization under the Ministry of Environment, Forest and Climate Change engaged in national forest cover mapping and assessments, is headquartered in Dehradun, Uttarakhand.

Q.76 [] — Correct Answer: (B)

Question: Which of the following National Parks of India are declared as World Heritage Sites by UNESCO? 1. Keoladeo National Park 2. Sundarbans National Park 3. Kaziranga National Park 4. Ranthambore National Park Select the correct answer using the code given below :
Explanation: Keoladeo National Park (1985), Kaziranga National Park (1985), and Sundarbans National Park (1987) are UNESCO World Heritage Sites. Ranthambore National Park is not inscribed on the World Heritage List.

Q.77 [] — Correct Answer: (B)

Question: Roaring Forties, Furious Fifties, and Shrieking Sixties are terms applied to strong westerly winds found
Explanation: In the Southern Hemisphere between 40° and 60°S latitude, the lack of landmasses allows the prevailing westerlies to blow with extreme unobstructed velocity, termed Roaring Forties, Furious Fifties, and Shrieking Sixties.

Q.78 [] — Correct Answer: (B)

Question: The Rohtang Pass, a high mountain pass connecting the Kullu Valley with Lahaul and Spiti, is situated in which Indian state?
Explanation: Rohtang Pass (elevation 3,978 m) is situated on the eastern Pir Panjal Range in Himachal Pradesh, connecting the Kullu Valley with the Lahaul and Spiti Valleys.

Q.79 [] — Correct Answer: (A)

Question: The supersonic cruise missile 'BrahMos' developed through a joint venture between India and Russia is named after which two rivers?
Explanation: BrahMos is named as a portmanteau of the Brahmaputra River in India and the Moskva River in Russia.

Q.80 [] — Correct Answer: (C)

Question: Through which of the following states does the Tropic of Cancer (23°30' N) NOT pass in India?
Explanation: The Tropic of Cancer passes through 8 Indian states: Gujarat, Rajasthan, Madhya Pradesh, Chhattisgarh, Jharkhand, West Bengal, Tripura, and Mizoram. It does NOT pass through Odisha.

Q.81 [] — Correct Answer: (C)

Question: What is the name of the strait where 'Adams' bridge' is situated ?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Geography (Physical, Indian & World)).

Q.82 [] — Correct Answer: (B)

Question: What is the primary characteristic geological feature of the Narmada River Valley?
Explanation: The Narmada River flows westward through a linear rift valley (fault graben) bounded between the Vindhya Range to the north and the Satpura Range to the south.

Q.83 [] — Correct Answer: (A)

Question: What was the major international consequence of the Suez Crisis of 1956 following Egypt's nationalization of the canal?
Explanation: The Suez Crisis forced Britain and France to withdraw under US and UN pressure, accelerating global decolonization and highlighting their displacement by the US and USSR as premier superpowers.

Q.84 [] — Correct Answer: (A)

Question: Which among the following regions of India is officially designated as a Global Biodiversity Hotspot?
Explanation: India contains 4 recognized global biodiversity hotspots: The Himalayas, Indo-Burma, Western Ghats & Sri Lanka, and Sundaland (Nicobar Islands).

Q.85 [] — Correct Answer: (A)

Question: Which is the correct arrangement of the following peninsular rivers of India when arranged from North to South?
Explanation: From north to south: Mahanadi (Chhattisgarh/Odisha) -> Godavari (Maharashtra/AP) -> Krishna (Maharashtra/Karnataka/AP) -> Cauvery (Karnataka/Tamil Nadu).

Q.86 [] — Correct Answer: (A)

Question: Which mountain hill range forms the natural physical boundary separating the state of Manipur from the state of Nagaland?
Explanation: The Barail Range is a tertiary mountain chain that extends across Assam, Nagaland, and Manipur, forming the water divide and physical boundary between Nagaland and Manipur.

Q.87 [] — Correct Answer: (A)

Question: Which of the following river basins is known as the 'Sorrow of Bengal'?
Explanation: The Damodar River was historically known as the 'Sorrow of Bengal' due to frequent catastrophic floods before the construction of the Damodar Valley Corporation (DVC) dams. Kosi is the Sorrow of Bihar.

Q.88 [] — Correct Answer: (A)

Question: Which of the following chemical substances dissolves in water with a vigorous evolution of heat (strongly exothermic reaction)?
Explanation: Reaction of quicklime with water forms slaked lime [CaO + H2O -> Ca(OH)2] and releases large amounts of thermal energy (slaking of lime).

Q.89 [] — Correct Answer: (C)

Question: Which one among the following animal tissués transports hormones and heat and maintains water balance ?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Geography (Physical, Indian & World)).

Q.90 [] — Correct Answer: (A)

Question: Which one among the following is the geological origin of the Comoros archipelago situated in the northern Mozambique Channel of the Indian Ocean?
Explanation: The Comoros islands are volcanic in origin, formed over an oceanic hot spot. Mount Karthala on Grande Comore is an active shield volcano.

Q.91 [] — Correct Answer: (A)

Question: Which one among the following was the nationwide anti-corruption citizen movement launched in 2011 advocating the enactment of the Jan Lokpal Bill?
Explanation: The 2011 Indian anti-corruption movement, organized primarily under the banner of India Against Corruption (IAC) and spearheaded by Anna Hazare, demanded an independent Lokpal.

Q.92 [] — Correct Answer: (A)

Question: Which one among the following is the purest natural source of fresh water in the earth's hydrological cycle before touching ground pollutants?
Explanation: Rainwater is the purest form of natural water as it is produced by the natural evaporation-condensation cycle (distillation process) in the atmosphere.

Q.93 [] — Correct Answer: (B)

Question: Which one of the following is the oldest mountain range in India?
Explanation: The Aravalli Range is one of the oldest fold mountain systems in the world, formed during the Proterozoic eon, now deeply eroded into relict mountains.

Q.94 [] — Correct Answer: (B)

Question: Which one of the following ocean currents is a cold current
Explanation: The Benguela Current is a cold ocean current flowing northward along the southwest coast of Africa in the South Atlantic Ocean. Gulf Stream and Brazil Current are warm Atlantic currents; Kuroshio is in the Pacific.

Q.95 [] — Correct Answer: (D)

Question: Which one of the following inland lakes in India has the highest water salinity?
Explanation: Sambhar Salt Lake in Rajasthan is India's largest inland salt lake and has the highest salinity among Indian inland lakes.

Q.96 [] — Correct Answer: (C)

Question: Which one of the following States of India is the largest producer of lignite coal?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Geography (Physical, Indian & World)).

Q.97 [] — Correct Answer: (D)

Question: Which one of the following countries is located entirely south of the Equator?
Explanation: Australia lies entirely in the Southern Hemisphere, well south of the Equator (latitudes 10°S to 43°S). Colombia, Indonesia, and Kenya are all crossed directly by the Equator.

Q.98 [] — Correct Answer: (C)

Question: Which one of the following trains/ railways passes through Germany, France, Austria, Hungary and Romania?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Geography (Physical, Indian & World)).

Q.99 [] — Correct Answer: (A)

Question: Which one of the following is the correct sequence of the topographical features of a river from its upper course to its lower course?
Explanation: Rapids form in the steep upper (youthful) course; meanders and ox-bow lakes form on the flat floodplains of the middle/lower course; estuaries or deltas form where the river meets the sea at its mouth.

Q.100 [] — Correct Answer: (C)

Question: Which one of the following glycopeptide antibiotics is commonly reserved in clinical practice as the 'drug of last resort' against severe multi-drug resistant Gram-positive infections (such as MRSA)?
Explanation: Vancomycin is a powerful glycopeptide antibiotic historically used as a drug of last resort for serious, life-threatening infections caused by Gram-positive bacteria unresponsive to other antibiotics.

Q.101 [] — Correct Answer: (A)

Question: Which one of the following ocean tides is produced when the Sun, the Moon, and the Earth are aligned in a straight line (syzygy)?
Explanation: Spring tides occur twice each month (during new moon and full moon) when gravitational pulls of the Sun and Moon reinforce each other in a straight line, producing the highest high tides.

Q.102 [] — Correct Answer: (A)

Question: Which one of the following Indian states has the longest coastline among all peninsular states of mainland India?
Explanation: Gujarat has the longest mainland coastline in India at approximately 1,600 km, followed by Andhra Pradesh (approx. 974 km).

Q.103 [] — Correct Answer: (A)

Question: Which one of the following is a cold ocean current flowing equatorward along the southwestern coast of the African continent?
Explanation: The Benguela Current is a prominent cold eastern boundary current of the South Atlantic subtropical gyre flowing north along the coast of Namibia and South Africa.

Q.104 [] — Correct Answer: (A)

Question: Which one of the following global climate types is characterized by mild, wet winters and warm, dry summers, supporting extensive citrus fruit orchards and vineyards?
Explanation: The Mediterranean climate (Cs in Köppen classification) features dry summers under subtropical high pressure and rainy winters dominated by mid-latitude westerlies, ideal for olives and grapes.

Q.105 [] — Correct Answer: (A)

Question: Which one of the following major rivers of India flows westward and empties into the Arabian Sea rather than the Bay of Bengal?
Explanation: The Narmada and Tapti rivers flow westward through tectonic rift valleys and empty into the Arabian Sea via the Gulf of Khambhat. Mahanadi, Godavari, and Cauvery flow eastward into the Bay of Bengal.

Q.106 [] — Correct Answer: (A)

Question: Which type of natural biome is characterized by low temperatures, short growing seasons, permafrost, and dominant vegetation consisting of mosses and lichens?
Explanation: The Tundra biome is treeless and circumpolar in high northern latitudes. Due to subsoil permafrost and biting winds, only low-lying mosses, lichens, and dwarf shrubs survive.

Q.107 [] — Correct Answer: (B)

Question: Who among the following was the founder of the 'Servants of India Society' in 1905?
Explanation: Gopal Krishna Gokhale founded the Servants of India Society in Pune in 1905 to train national missionaries for the service of India and promote social advancement.

Q.108 [] — Correct Answer: (A)

Question: A female Anopheles mosquito acts as the biological vector for which one of the following diseases?
Explanation: Female Anopheles mosquitoes transmit Plasmodium parasites causing Malaria. Dengue, Chikungunya, and Yellow fever are transmitted by Aedes mosquitoes.

Q.109 [] — Correct Answer: (B)

Question: A person suffering from myopia (near-sightedness) is advised to wear lenses of:
Explanation: Myopia occurs when the eyeball is too elongated or cornea too curved, causing distant rays to focus in front of the retina. A diverging (concave) lens spreads the incoming rays so the image forms precisely on the retina.

Q.110 [] — Correct Answer: (A)

Question: An object has a mass of 6 kg on the surface of the Earth. When taken to the Moon (where acceleration due to gravity is 1/6th that of Earth), its mass will be:
Explanation: Mass is an intrinsic property representing the amount of matter in a body and remains constant everywhere (6 kg). Only the weight (W = mg) decreases to 1/6th on the Moon.

Q.111 [] — Correct Answer: (C)

Question: Consider the following statements regarding the Chief of Defence Staff (CDS) of the Indian Armed Forces: 1. The CDS functions as the permanent Chairman of the Chiefs of Staff Committee. 2. The CDS acts as the principal military adviser to the Defence Minister on tri-service matters. Which of the statements given above is/are correct?
Explanation: Both statements are correct: The CDS is a 4-star General who heads the Department of Military Affairs (DMA), chairs the Chiefs of Staff Committee, and acts as principal military adviser to the Raksha Mantri.

Q.112 [] — Correct Answer: (A)

Question: Down's syndrome, a genetic condition causing developmental and intellectual delays in humans, is caused by which chromosomal abnormality?
Explanation: Down's syndrome is caused by non-disjunction of chromosome 21 during meiosis, resulting in cells having 47 chromosomes instead of 46 (Trisomy 21).

Q.113 [] — Correct Answer: (A)

Question: For the same rise in temperature, which of the three states of matter undergoes the greatest volumetric thermal expansion?
Explanation: Gases exhibit the highest coefficient of thermal expansion because intermolecular forces are minimal, allowing particles to move far apart when heated.

Q.114 [] — Correct Answer: (B)

Question: If excess chemical fertilizer is applied to a potted plant without adding adequate water, the plant wilts and dies because of:
Explanation: High concentration of fertilizer salts creates a hypertonic external solution around the roots. Water is drawn out from plant cells via exosmosis, causing cellular plasmolysis and wilting.

Q.115 [] — Correct Answer: (A)

Question: In demographic studies and development economics, the Dependency Ratio of a nation is mathematically defined as:
Explanation: The dependency ratio measures the age-population ratio of typically dependent citizens (under 15 and over 64) relative to the productive working-age population.

Q.116 [] — Correct Answer: (B)

Question: In the human digestive system, the opening of the stomach into the small intestine (duodenum) is regulated by the:
Explanation: The pyloric sphincter is a band of smooth muscle at the junction between the pylorus of the stomach and the duodenum of the small intestine that controls the flow of chyme.

Q.117 [] — Correct Answer: (A)

Question: In the light of this statement
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (General Science (Physics, Chemistry, Biology)).

Q.118 [] — Correct Answer: (C)

Question: Lysosome is formed from which one of the following cell organelles?
Explanation: Lysosomes are membrane-bound organelles containing digestive enzymes that are packaged and budded off from the Golgi apparatus/bodies.

Q.119 [] — Correct Answer: (A)

Question: The International Court of Justice (ICJ), the principal judicial organ of the United Nations based at The Hague, is composed of how many judges elected for a nine-year term?
Explanation: The ICJ consists of 15 judges elected by the UN General Assembly and Security Council for 9-year terms. Five judges are elected every three years.

Q.120 [] — Correct Answer: (B)

Question: The Reserve Bank of India has recently constituted a high-level task force on Public Credit Registry (PCR) to suggest a road map for developing a transparent, comprehensive and near-real-time PCR for India. The task force is headed by
Explanation: Official UPSC CDS Solution: Assessed under General Science (Physics, Chemistry, Biology) according to UPSC CDS standards.

Q.121 [] — Correct Answer: (A)

Question: The fundamental physical law which explains why a heavy steel ship floats on the ocean while a small iron needle sinks is:
Explanation: Archimedes' Principle states that a body immersed in a fluid is buoyed up by a force equal to the weight of fluid displaced. A hollow ship displaces a volume of water whose weight exceeds the ship's total weight.

Q.122 [] — Correct Answer: (A)

Question: The human body's primary sensory organ responsible for maintaining balance, posture, and equilibrium is located in the:
Explanation: The vestibular apparatus in the inner ear, consisting of the three semicircular canals, utricle, and saccule, detects head motion and gravity to maintain balance and equilibrium.

Q.123 [] — Correct Answer: (B)

Question: The kinetic energy of an object is always conserved.
Explanation: Official UPSC CDS Solution: Assessed under General Science (Physics, Chemistry, Biology) according to UPSC CDS standards.

Q.124 [] — Correct Answer: (A)

Question: The natural plant dye Henna (Lawsone) imparts an orange-red stain to human skin and hair by reacting primarily with:
Explanation: The active colorant in henna is lawsone (hennotannic acid), which binds strongly through Michael addition to keratin proteins found in hair, nails, and the epidermis of the skin.

Q.125 [] — Correct Answer: (C)

Question: Vitamin A ß-carotene ß-carotene Vitamin A engineered 'Golden in
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (General Science (Physics, Chemistry, Biology)).

Q.126 [] — Correct Answer: (A)

Question: Wavelengths of which of the following colors of the visible light spectrum are maximally absorbed by chlorophyll in green plants for photosynthesis?
Explanation: Chlorophyll a and b show maximum absorption in the blue (430-450 nm) and red (640-660 nm) regions of the visible spectrum, while reflecting green light (giving plants their green appearance).

Q.127 [] — Correct Answer: (B)

Question: What is 'heavy water' (D2O) used as in nuclear power reactors?
Explanation: Heavy water (deuterium oxide, D2O) contains deuterium atoms and is used primarily as a neutron moderator (slowing down fast neutrons) and as a coolant in Pressurized Heavy Water Reactors (PHWRs).

Q.128 [] — Correct Answer: (B)

Question: What is a 'Green Data Centre'?
Explanation: A green data centre is an enterprise storage repository where lighting, electrical, cooling, and compute systems are engineered to achieve maximum power usage effectiveness (PUE) and minimal carbon emissions.

Q.129 [] — Correct Answer: (C)

Question: What is that particular tribal group?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Defence, Military & Current Affairs).

Q.130 [] — Correct Answer: (C)

Question: What is the minimum mandate of a democratic government ?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Defence, Military & Current Affairs).

Q.131 [] — Correct Answer: (A)

Question: What is the primary chemical compound that constitutes natural pearls and sea shells?
Explanation: Pearls and mollusk shells consist primarily of calcium carbonate (CaCO3, mostly in the form of aragonite crystals) deposited in concentric layers held together by the organic protein conchiolin.

Q.132 [] — Correct Answer: (A)

Question: Which among the following are the two primary raw materials used in the saponification process to manufacture soap?
Explanation: Soap is produced by saponification, the alkaline hydrolysis of triglycerides (vegetable oils or animal fats) with a strong base such as sodium hydroxide (caustic soda) or potassium hydroxide.

Q.133 [] — Correct Answer: (C)

Question: Which among the following oils has the maximum protein •content ?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (General Science (Physics, Chemistry, Biology)).

Q.134 [] — Correct Answer: (C)

Question: Which cell organelle is famously known as the 'Powerhouse of the Cell' due to ATP production?
Explanation: Mitochondria produce adenosine triphosphate (ATP) through cellular respiration and oxidative phosphorylation, thereby serving as the powerhouse of eukaryotic cells. Lysosomes are suicide bags.

Q.135 [] — Correct Answer: (A)

Question: Which of the following statements relating to the Non-Aligned Movement (NAM) is/are correct? 1. It was founded to maintain independence from rival Cold War power blocs. 2. Military alliances formed a core component of NAM. Select the correct answer using the code given below:
Explanation: Statement 1 is correct: NAM originated at the 1955 Bandung Conference and 1961 Belgrade Summit. Statement 2 is incorrect: NAM was explicitly non-military and rejected joining Cold War military alliances like NATO or the Warsaw Pact.

Q.136 [] — Correct Answer: (A)

Question: Which of the following noble gases is present in the highest abundance by volume in dry atmospheric air?
Explanation: Argon is the third most abundant gas in dry air (approx. 0.934% by volume). Other noble gases like Neon (0.0018%), Helium (0.0005%), and Krypton (0.0001%) are trace elements.

Q.137 [] — Correct Answer: (C)

Question: Which of the following statements regarding the Armed Forces (Special Powers) Act (AFSPA) is not correct?
Explanation: AFSPA cannot be invoked arbitrarily by district magistrates; an area must be formally declared a 'disturbed area' by the Central Government, Governor, or UT Administrator under Section 3 of the Act.

Q.138 [] — Correct Answer: (A)

Question: Which of the following infectious diseases is caused by a protozoan parasite and transmitted by the bite of the sandfly?
Explanation: Kala-azar (Visceral leishmaniasis) is caused by the protozoan parasite Leishmania donovani and transmitted to humans by the bite of infected female phlebotomine sandflies.

Q.139 [] — Correct Answer: (A)

Question: Which of the following chemical compounds exhibits electrovalent (ionic) bonding rather than covalent bonding?
Explanation: Calcium chloride ($CaCl_2$) is an ionic compound formed between a metal (calcium) and non-metal (chlorine) by complete transfer of electrons. CH_4, CCl_4, and NH_3 are covalent compounds.

Q.140 [] — Correct Answer: (A)

Question: Which of the following pairs of international judicial or financial organizations and their headquarters is correctly matched?
Explanation: The ICJ is headquartered at the Peace Palace in The Hague, Netherlands. IMF and World Bank are in Washington, D.C.; WTO is in Geneva.

Q.141 [] — Correct Answer: (B)

Question: Which one among the following natural or artificial processes produces light through a chemical reaction (chemiluminescence)?
Explanation: Fireflies produce light through bioluminescence, a form of chemiluminescence where the pigment luciferin is oxidized in the presence of the enzyme luciferase and ATP without producing heat.

Q.142 [] — Correct Answer: (A)

Question: Which one among the following substances is lipid-soluble and absorbed directly and rapidly across the epithelial lining of the human stomach into the bloodstream?
Explanation: Unlike most foods which require enzymatic digestion and are absorbed in the small intestine, ethanol is lipid-soluble and can be directly absorbed through the gastric mucosa of the stomach.

Q.143 [] — Correct Answer: (A)

Question: Which one among the following was developed as an indigenous high-performance supercomputer by the Indian Space Research Organisation (ISRO) in 2011?
Explanation: SAGA-220 (Supercomputer for Aerospace with GPU Architecture-220 teraflops) was built by ISRO at the Vikram Sarabhai Space Centre (VSSC) using commercial off-the-shelf GPU hardware.

Q.144 [] — Correct Answer: (B)

Question: Which one of the following metals is stored in kerosene oil to prevent it from reacting with atmospheric moisture and oxygen?
Explanation: Sodium and potassium are highly reactive alkali metals that react violently and exothermically with water and oxygen at room temperature, releasing combustible hydrogen. They are safely preserved immersed in kerosene.

Q.145 [] — Correct Answer: (B)

Question: Which one of the following gases is responsible for the effervescence observed when baking soda is added to vinegar?
Explanation: When sodium bicarbonate (baking soda, $NaHCO_3$) reacts with acetic acid (vinegar, CH_3COOH), sodium acetate, water, and carbon dioxide (CO_2) gas are produced. The rapid release of CO_2 produces vigorous effervescence.

Q.146 [] — Correct Answer: (B)

Question: Which one of the following elements is essential for the formation of chlorophyll in green plants?
Explanation: Official UPSC CDS Solution: Assessed under General Science (Physics, Chemistry, Biology) according to UPSC CDS standards.

Q.147 [] — Correct Answer: (B)

Question: Which one of the following places of India experiences highest atmospheric pressure during winter?
Explanation: Official UPSC CDS Solution: Assessed under General Science (Physics, Chemistry, Biology) according to UPSC CDS standards.

Q.148 [] — Correct Answer: (C)

Question: Which one of the following is an object with such a strong gravitational field that even light cannot escape from its surface?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (General Science (Physics, Chemistry, Biology)).

Q.149 [] — Correct Answer: (A)

Question: Which one of the following human diseases is caused by a protozoan parasite and NOT by bacteria or viruses?
Explanation: Malaria is caused by the protozoan Plasmodium (transmitted by female Anopheles mosquito). Tetanus is bacterial; Measles and Mumps are viral diseases.

Q.150 [] — Correct Answer: (A)

Question: Which one of the following is India's indigenously designed and built single-engine supersonic Light Combat Aircraft (LCA)?
Explanation: LCA Tejas is an indigenous single-engine, delta-wing multirole light fighter aircraft designed by the Aeronautical Development Agency (ADA) and manufactured by Hindustan Aeronautics Limited (HAL).

Q.151 [] — Correct Answer: (C)

Question: Which one of the following metals cannot be used as a sacrificial anode ?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (General Science (Physics, Chemistry, Biology)).

Q.152 [] — Correct Answer: (A)

Question: Which one of the following chemical compounds is widely used as a mordant in the textile dyeing and leather tanning industries?
Explanation: Potash alum (potassium aluminum sulfate) acts as a mordant by providing aluminum ions that bind natural dyes to textile fibers, fixing colors permanently.

Q.153 [] — Correct Answer: (A)

Question: Which one of the following pairs of Indian military training academies and their locations is correctly matched?
Explanation: NDA is in Khadakwasla (Pune); IMA is in Dehradun; OTA is in Chennai/Gaya; INA is in Ezhimala (Kerala).

Q.154 [] — Correct Answer: (C)

Question: Which one of the following deficiencies is most frequently responsible for anemia in India ?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Defence, Military & Current Affairs).

Q.155 [] — Correct Answer: (A)

Question: Which one of the following viral diseases is transmitted to humans by the bite of the female Aedes aegypti mosquito?
Explanation: Aedes aegypti mosquitoes transmit Dengue, Chikungunya, Zika, and Yellow fever. Malaria is spread by Anopheles, Kala-azar by sandflies, and sleeping sickness by tsetse flies.

Q.156 [] — Correct Answer: (A)

Question: Which one of the following alloys is commonly used for making heating elements in electrical appliances like heaters and electric irons?
Explanation: Nichrome (an alloy of 80% nickel and 20% chromium) has high electrical resistivity and a high melting point, and does not easily oxidize at high temperatures.

Q.157 [] — Correct Answer: (A)

Question: Which one of the following synthetic chemical compounds is widely used by farmers as a selective systemic herbicide to destroy broadleaf weeds in cereal crops?
Explanation: 2,4-D is a synthetic auxin herbicide that selectively eliminates dicotyledonous (broadleaf) weeds without harming monocotyledonous grasses (wheat, corn, rice).

Q.158 [] — Correct Answer: (C)

Question: Which one of the following parameters will remain constant during the fall ?
Explanation: Official UPSC CDS Rationale: Tested in CDS General Knowledge (Defence, Military & Current Affairs).

Q.159 [] — Correct Answer: (A)

Question: Which one of the following physical properties decreases systematically as one moves from left to right across a period in the Periodic Table?
Explanation: Atomic radius decreases across a period from left to right due to increased effective nuclear charge pulling valence electrons closer to the nucleus.

Q.160 [] — Correct Answer: (A)

Question: Which of the following statements about the commonly used automobile battery are true? 1. It is usually a lead-acid battery. 2. It has six cells with a potential of 2 Volt each. 3. Its cells work as Galvanic Cells while discharging power. 4. Its cells work as electrolytic cells while recharging. Select the correct answer using the code given below :
Explanation: A standard 12V car battery consists of six 2V lead-acid cells connected in series. When delivering current it operates as a galvanic cell (chemical to electrical); when being recharged by the alternator it operates as an electrolytic cell.

Q.161 [] — Correct Answer: (C)

Question: Which one of the following is responsible for the stimulating effect of tea?
Explanation: The stimulating effect of tea is primarily due to the purine alkaloid caffeine (also known as theine), which acts as a central nervous system stimulant.

Q.162 [] — Correct Answer: (A)

Question: Which of the following statements about the commonly used automobile battery are true? 1. It is usually a lead-acid battery. 2. It has six cells with a potential of 2 Volt each. 3. Its cells work as Galvanic Cells while discharging power. 4. Its cells work as electrolytic cells while recharging. Select the correct answer using the code given below :
Explanation: A standard 12V car battery consists of six 2V lead-acid cells connected in series. When delivering current it operates as a galvanic cell (chemical to electrical); when being recharged by the alternator it operates as an electrolytic cell.

Q.163 [] — Correct Answer: (C)

Question: Which one of the following is responsible for the stimulating effect of tea?
Explanation: The stimulating effect of tea is primarily due to the purine alkaloid caffeine (also known as theine), which acts as a central nervous system stimulant.

Q.164 [] — Correct Answer: (A)

Question: Fiscal Deficit in the Union Budget of India is defined as:
Explanation: Fiscal Deficit = Total Budget Expenditure - Total Receipts excluding borrowings. It represents the total borrowing requirements of the government from all sources.

Q.165 [] — Correct Answer: (B)
