(c) 2 and 3 (d) only 1,2and3 your response on the

103. Sl: The definition of large farmers differs from state to state in India. S6: This trend increased the income base of those who were already relatively well-off and better placed in society. P : In the initial phase of the Green Revolution, the large farmers were able to adopt the High Yielding Varieties easily. Q : The new varieties increased their savings, both to buy machinery that can displace labour and to purchase more land. For example, a farmer having 10 acres in Kerala is a large farmer, while in Rajasthan, Punjab and Haryana he falls under the category of a small or medium farmer. S : All the studies conducted in areas where Green Revolution is a success show that the large farmers have been the main gainers of the package programme. [CDS (I) 2021 Q24]

104. Sl: The Great Depression was a period of unemployment, low profits, low prices of goods, high poverty and a stand-still trade market that affected the entire world. S6: Most notably among these was the New Deal, which involved large scale federal relief programmes, aid to agriculture, support for labour unions, etc. P : It began around 1929 and lasted till the mid-1930s. Though the stock market crash of 1929 did not cause the Depres- Sion, it certainly increased the difficulty of recovery. The worst hit sectors were heavy industry, agriculture, mining and logging. The Depression ended in 1935 and led to major political initiatives. [CDS (I) 2021 Q25]

107. Sl: Land is a very important resource. India has a vast landmass but it is important to ensure careful planning in the utilization of its land resources. P • It is therefore an important asset that needs to be used with care and concern because it is finite in Q : All over the world, land supports natural vegetation, wildlife, human life, economic activities, and communication and transport Hence, land is of great signifi- cance for all nations. In consequence to all of these, careful planning of land use assumes the utmost significance. [CDS (I) 2021 Q28]

(a) Q RPS (b) SQPR (c) Q PS R (d) SQRP

108. Sl: Trade and transport have been very significant in the progress of human life. S6: Thus, trade transport and com- munication complement each other. For a long time trade and trans- port moved within the restricted boundaries of space and time. This has been made possible by the development of a fast and efficient transport and communi- cation system. However, with the developments in the field of science and technology, trade and transport have spread all over the world. S : The world has, as a consequence, become one big village and distances have become immaterial or, to be more precise, distances seem to have shrunk. [CDS (I) 2021 Q30]

SECTION : SENTENCE ORDERING (S1-S6) (10 QUESTIONS)

— SPACE FOR ROUGH WORK —

146. Sl: In a typical Indian village today, one is certain to find groups of women talking about finance. In a society where women play significant but never-recognised roles, being a part of an SHG which gives them such financial power is indeed a matter of pride. P Sitting there, they might proudly introduce themselves by saying that they are members of a self- help group (SHG). Altematively, they might lend money at reasonable interest rates to members for starting small businesses. They can be seen sitting under a tree, in an abandoned school building, or in the front yard of a village resident's dilapidated home, holding thick notebooks. S : An SHG is usually a community group of 10-12 women from similar socio-economic back- ground who pool their financial resources for taking up joint economic activities. [CDS (II) 2026 Q31]

(a) Q S PR (b) R P S Q (c) R Q SP (d) Q SPR

147. Sl: For much of history, sumames, or last names, were not considered necessary. S6: These two pieces of medieval bureaucracy meant that virtually everyone had to settle on a definite and fixed surname. P : The other was the enactment of the Statute of Additions in 1413, which required that all legal documents to contain not just the person's given name, but also his or her occupation and place of abode. One was the introduction of a poll tax in 1379, which led the government to collect the name of every person aged sixteen or over. But sometimes, the process was accelerated such as in England where two events gave a boost to the adoption of surnames. S • The business of acquiring sur- names was a long one that evolved over centuries rather than [CDS (II) 2026 Q32]

148. : The first American settlers happened to live in the midst of perhaps the most exciting period in the history of the English language. Had the settlers gone a quarter of a century earlier, America might well have preserved those pre- vious forms, as it preserved many other archaisms. P • Similarly, thee and thou pronoun forms were also dying out. This was a time when 12,000 words were being added to the language. One such change which these first settlers had already adopted was to use the s form on verbs, saying has rather than hath, runs rather than runneth. S • It was also a time of considerable change in the structure of the language. [CDS (II) 2026 Q33]

(a) R PQS (b) Q SRP (c) SQPR (d) Q PRS -

149. Sl: In 1984, two small clay tablets of vaguely rectangular shape were found in Tell Brak, Syria, dating from the fourth millennium BCE. S6: All our history begins with these two modest tablets as they are among the oldest examples of writing we know. One of the animals may have been a goat, in which case, the other probably was a sheep. Lying there were these simple, unimpressive objects, each bearing a few discrete markings : a small indentation near the top and some sort of stick-drawn aninial in the centre. R : The indentation, on the other hand, represents, according to archaeologists, the number ten. S : These two tablets were seen by an expert the year before the Gulf War, in an unostentatious display case in the Archaeological Museum of Baghdad. [CDS (II) 2026 Q34]

(a) S Q PR (b) Q SPR (c) Q SRP (d) SQRP

150. Sl: For generations, the Balaraju pond remained the primary water source of Perakalapudi village in Guntur district of Andhra Pradesh. S6 : It was only after major restoration work was carried out to restore the pond's storage capacity that the community could return to its traditional livelihood. By the 2000s, decades of water mismanagement led to a rapid drop in the groundwater table as well. However, overexploitation caused the pond to shrink to half its original size and reduced its water storage capacity by 60 per cent. The pond, spread across 24 hec- tares, supported irigation, sus- tained the fishing community, met household needs and remained home to a wide variety of flora and fauna. S • As the pond disappeared, the households relied on groundwater to meet their daily needs. [CDS (II) 2026 Q35]

(a) Q RPS (b) Q PRS (c) R Q SP (d) R Q PS

151. SI: While most people are com- fortable talking about colour, the concept of luminance — even though it is more fundamental — seems less familiar. S6: This is something the Impres- sionist artists were able to master and it gave a shimmering, lively quality to many of their paintings. P • For example, given two patches of grey, they can easily tell which is lighter. Q : As the artist and art teacher Josef Albers states, just as a musician should be able to distinguish between a higher tone and a lower tone, an artist should be able to distinguish between higher and lower light intensity between different colours. Artists, however, must learn to distinguish differences in lumi- nance, independent of colour. But given two patches of different colours, it is often difficult to make the same distinction. [CDS (II) 2026 Q36]

(a) PS R Q (b) PS QR (c) R Q SP (d) Q RSP

152. Sl: Wooden fumiture is durable and long-lasting, reducing the need for frequent replacement. S6: A still better and sustainable, though slow, way is to plant new trees to maintain the forest cover. Some of these negative impacts are deforestation and the loss of habitat for numerous species of Deforestation in turn disrupts water-cycles and accelerates the pace of climate change. However, its use causes several negative ecological impacts. One way of reducing the use of wood is to recycle it as much as possible. [CDS (II) 2026 Q37]

(a) R PQS (b) Q SPR (c) SQRP (d) PRS Q

153. Sl: Circadian rhythm is a term used to refer to the physical, mental and behavioural changes an organism experiences over a 24-hour cycle. S6: Maintaining a good circadian rhythm through appropriate expo- sure to natural light, consistent sleep schedules and times of eating, and adequate physical exercise during the day can allow an organism to live a healthy life. P : Prolonged disruption, moreover, can cause long-term damages such as metabolic diseases, cardio- vascular problems, and mental health issues. Light and dark (daytime and night-time) have the biggest influence on these circadian rhythms. Circadian rhythms are also affected by food intake, stress, physical activity, social environ- ment and temperature. When any one or more than one of these cause the circadian rhythm to be disrupted, it can lead to sleep problems, drowsiness and poor focus. [CDS (II) 2026 Q38]

(a) PRSQ (b) Q RSP (c) Q RPS (d) R Q PS

154. Sl: All the different parts of our eye help us to see. S6 : These electrical signals then travel through the optic nerve to the brain which in turn converts these signals into the images we see. P : The iris, which is the coloured part of the eye, controls how much light the pupil lets in. Q : Next, light passes through the lens, the clear inner part of the eye, which focuses this light on the retina. R • First, light passes through the comea, the clear front layer of the eye, and enters the eye through an opening called the pupil. S • When it hits the retina, special cells called photoreceptors convert the light into electrical signals. [CDS (II) 2026 Q39]

— SPACE FOR ROUGH WORK —

155. SI : Humans in colder climates first began wearing some form of sturdy foot covering at least 40,000 years ago. S6: Today, minimalistic barefoot shoes are becoming popular because they allow the wearer to feel the ground beneath their feet while still offering some protec- tion and support. P • Unfortunately, modern shoes have also had a negative impact on feet due to bad design such as a narrow toe box, difference in heel to toe drop, however slight, and stiff soles. Earlier skeletons had very robust little toes that could bend and grip surfaces. R These gradually evolved to become less substantial than the big toe because shoe-like coverings reduced the mechanical stress on them and made them weaker. The evidence for this comes from the study of changes in the structure of the toe bones of foot skeletons from that time. [CDS (II) 2026 Q40]

769. Sl: Traditional songs and music form the identity of the tribal culture. S6: These tribal songs, on one hand, . glorified their hero and on the other, inspired their fellow tribes- man to participate in the freedom struggle. P : The tribal area of Chhatisgarh always resonated with the sound of traditional tribal songs and music. They reflect tribals' natural spirit, unconditional love, and innate energy at every stage of their life. Initially, the tribal songs in their dialects, reverberated with the rebellion of their area, and then with the movement that was prevalent in the country. The forest areas and tribal settlements of Chhatisgarh, began the revolt against the British at the very beginning of the freedom struggle, much before the urban [CDS (I) 2026 Q31]

771. Sl: The equatorial zone is generally an area of abundant precipitation (over 200 centimetres annually). S6: It is to be noted that a larger part of the precipitation in this region falls as heavy intermittent convec- tive showers accompanied by thunder and lightning. The ascending air currents become intensified locally in the tropical storms that produce abundant precipitation in the Caribbean, the southwest Pacific Ocean, the Indian Ocean and the China Sea. Q : Over the land areas, most of the precipitation occurs from the thunderstorms that are very fre- quent and active in the equatorial regions. This high level of precipitation is due to the equatorial belt's high temperature, high humidity and highly unstable air. S : The trade winds from both the hemispheres converge and give rise to a general upward motion of air. [CDS (I) 2026 Q36]

772. Sl: The period branded as the era of the Industrial Revolution was essentially a period of transforma- S6: This wage was however, not enough to keep the worker pro- perly clothed or fed and thus, the Industrial Revolution could not solve the problem of distribution. P : A definite polarisation of indus- trial • society between two main classes — capitalists and workers — was visible. Q : It marked the beginning of the final phase of the broader trans- formation from feudalism to capitalism and capitalism made its presence felt all over the Europe. Actual production in the factories was done by the workers but the workers had very little and so for survival, they were required to continuously sell this labour power for wages. S : In the capitalist mode of produc- tion the factories and heavy machineries were owned and controlled by the capitalist class. [CDS (I) 2026 Q37]

882. The word 'puny' means [CDS (I) 2010 Q54]

(a) brave

(b) daring

(d) doomed SRSU-F-ENG/60A Passage—II People do not understand the nature or ramifications of most educational changes. They become involved in change voluntarily or involuntarily and in either case experience ambivalence about its meanings, form, and consequences. I have implied that there are a number Of things at stake—changes in goals, skills, philosophy or beliefs, behaviour, etc. Subjectively these different aspects are experienced in a diffuse, incoherent manner. Change often is not conceived of as being multidimensional. Objectively, it is possible to clarify the meaning of an educational change by identifying and describing its separate dimensions. Ignorance of these dimensions explains a number of interesting phenomena in the field of educational changes : for example, why some people accept an innovation they do not understand; why some aspects of a change are implemented and others not; why strategies for change neglect certain essential components. The concept of objective reality is tricky. Reality is always defined by individuals and groups. But individuals and groups interact to produce social phenomena (constitutions, laws, policies, educational change programmes), which exist outside any given individual. There is also the danger that the objective reality is only the reflection of the producers of change and thus simply a glorified version of their subjective conceptions. We can reduce this problem by following the practice of posing double questions : "What is the existing conception of reality on a given issue?" Followed quickly by "says who?"

(c) tiny

943. SI : Among the momentous watersheds through which human beings have passed since their appearance over 100,000 years ago, none has been more profound in its consequences than the shift to agriculture. S6 : Unfortunately, such transformations disrupted delicate natural balances as humans sought enhanced control over their new modes of subsistence. They did this by purposefully transforming landscapes with their agricultural fields and pastures. They lived much like the way in which their own hominid predecessors had lived for millions of years, as integral components of the Earth's ecosystems. R: However, with the invention of practices of agriculture, these new farmers and herders began manipulating their surroundings to an unprecedented degree. Before that, for countless generations, nearly all humans had lived as hunters and gatherers, dwelling together in small, stable, nomadic bands that operated in close harmony with nature.
