(d) A 20 - The next 03 (three) items are based on the following passage • A government in a democratic country has to respond priorities in public to on-going criticism and political reproach, and to the threats to survival it has to face. The removal of long standing deprivations of the dis-advantaged people of our country may, in effect, be hampered by the biases' in political pressure, in particular when the bulk of the social agitation is dominated by new problems that generate immediate and noisy discontent among the middle class Indians with a voice. If the politically active threats are concen- trated only on some specific new issues, no Of matier how important (such as high prices consumer goods for the relatively rich, or the fear that India political sovereignty might be compromised by its nuclear deal with the USA), rather than on the terrible general of India of deprivation, inheritance acute deficient schooling, lack Of medical attention for the poor, and extraordinary under nourish- (especially of children and also of ment young women). then the pressure on democratic relentlessly towards giving governance acts priority to only those •particular new issues, rather than to the gigantic persistent deprivations that are at the root Of so much inequity and injustice in India. The perspec- five of realization of justice and that of an adequately broad nyaya are central not only but also the to the theory Of justice, to practice of democracy.
